Nature of Offence

: - Adverse Analytical Finding (AAF)

#### **BACKGROUND**

Mrs.Manomi Bandara (hereinafter referred to as the athlete) was tested on 19.05.2018 as an "In Competition Testing" at the National Sports Festival - cycling 2018. The Number assigned to her urine sample is 4285199. The athlete signed a Doping Control Form in which he acknowledged that her urine sample collection was carried out in accordance with the relevant procedure laid down in the WADA Code. In the said form, under "Declaration"

of Medication and Blood Transfusions" the athlete has stated "Panadol" (The Doping Control Form of SLADA dated 19.05.2018 signed by the athlete is herewith produced and marked as "X1")

The athlete's urine sample (bearing Sample No.4285199) was sent to the National Dope Testing Laboratory (NDTL) in India (a WADA accredited laboratory).SLADA received the report of the said sample on 14.06.2018. The sample "A" was found to be positive and the report states that "Adverse Analytical Finding For Prednisolone and 20 – B OH Prednisolone (Metabolite of prednisolone), Glucocorticosterolds..." (A copy of the said Report of the National Dope Testing Laboratory dated 14.06.2018 is herewith produced and marked as "X2").

The presence of the prohibited substances in an athlete's urine sample *prima facie* constitutes an Anti-Doping Rule Violation under Article 2.1 of the WADA Code.

### PRELIMINARY INQUIRY

In the event of a positive result, the athlete should be given the opportunity to face a preliminary inquiry to state whether she wished to request for the testing of the B sample within the prescribed period of seven days starting from the date appeared on the testing report ("X2"). In this case, both the accused athlete Mrs. Manomi Bandara and the Secretary of the Sri Lanka Cycling Federation were informed by the letters dated 18.06.2018 of the results of the laboratory test report and was also asked the athlete to participate in the preliminary inquiry for B sample analysis. (Copies of the said letters dated 18.06.2018 addressed to the Athlete and the Secretary of the Sri Lanka Cycling Federation are herewith produced and respectively marked as "X3" and "X4")

Accordingly, the Athlete Mrs. Manomi Bandara reported to Sri Lanka Anti-Doping Agency on 21.06.2018. The accused athlete came on her own without any representation for her and faced the preliminary inquiry for B sample analysis where the athlete submitted her consent in writing that she was not going for the analysis of her Sample B. (copy of the letter dated 21.06.2018 signed by the athlete to the effect that she was not proceeding to his B Sample and respectively marked as "X5")

### THE DISCIPLINARY INQUIRY

The Disciplinary Inquiry into the doping rule violation by the accused athlete Mrs. Manomi Bandara was conducted by Sri Lanka Anti-Doping Disciplinary Panel on 20.09.2018 at the National Institute of Sports Science (NISS), Colombo -07. On this date of hearing the

accused athlete Mrs. Manomi Bandara appeared before the Panel on this inquiry. (Copies of the said letters dated 12.09.2018 addressed to the Athlete and the Secretary of the Sri Lanka Cycling Federation are herewith produced and respectively marked as "X6" and "X7")

### **EVIDENCE OF THE ATHLETE**

At the hearing of the Disciplinary Inquiry, the accused athlete giving evidence accepted the fact that a doping charge has been leveled against her. Due to the financial difficulties she has informed the disciplinary panel that she will not proceed with the B sample. Thereafter disciplinary panel has informed SLADA to conduct the B sample analysis with respect to this athlete on 20.09.2018 at the cost and expense of SLADA.

Accordingly the NDTL laboratory conducted the B sample analysis and submitted the report on 11.10.2018. It has been confirmed through the laboratory report that the B sample contained prohibited substances in it. (A copy of the said Report of the National Dope Testing Laboratory dated 11.10.2018 is herewith produced and marked as "X8").

Based on that the athlete was informed to submit an explanation and facts for the justification of her defense, if any, by letter dated 13.11.2018.

Thereafter, the athlete has replied to the aforesaid letter by letters dated 17.12.2018 & 21.12.2018. (Copies of the letters dated 17.12.2018 & 21.12.2018 are herewith produced and marked as "X9" & "X10").

#### ANALYSING THE EVIDENCE

On the face of the Laboratory Report marked "X2" & "X6", an Adverse Analytical Finding has been reported by the National Dope Testing Laboratory (NDTL) in respect of the Urine Sample A & B of the accused athlete Mrs.Manomi Bandara.

Article 2.1 of the World Anti-Doping Code 2015 reads as follows;

# "2.1 Presence of a Prohibited Substances or its Metabolites or Markers in an Athlete's Sample

It is each athlete's personal duty to ensure that no Prohibited Substance enters his or her body. Athletes are responsible for any Prohibited Substance or its Metabolites or Markers found to be present in their Samples. Accordingly, it is not necessary that intent, fault,

negligence or knowing use on the Athlete's part be demonstrated in order to establish an anti-doping rule violation under Article 2.1."

In view of the all the material and evidence placed before the Sri Lanka Anti-Doping Disciplinary Panel, we determine that within the meaning of required standard of proof set out in Article 3.1 of the WADA Code, the relevant charge against the accused athlete Mrs.Manomi Bandara for the violation of Article 2.1 of the WADA Code has been established to the comfortable satisfaction of proof.

In respect of Article 10.2.1 of the WADA Code, the period of ineligibility shall be four (4) years for a violation of Article 2.1 of the Code unless the anti-doping rule violation does not involve a specified substance or the violation was unintentional in which case the period of ineligibility shall be two (2) years.

The substance of "Prednisolone and 20 – B OH Prednisolone (Metabolite of Prednisolone) Glucocorticosteroids" which is reported to be present in the Samples A & B of the accused athlete is included in the prescribed Class S9 in the WADA Prohibited List 2017.

Considering all the above material evidence pertaining to this case, we, the Sri Lanka Anti-Doping Disciplinary Panel finds and determines that the accused athlete has violated the Article 2.1 of the WADA Code of having prohibited substances in her Urine sample A & B.

### **SANCTION**

We, the Sri Lanka Anti-Doping Disciplinary Panel is unanimous in imposing a sanction of FOUR YEARS INELIGIBILITY PERIOD on the aforementioned athlete MRS.MANOMI BANDARA commencing from 19.05.2018 and up to 18.05.2022.

The World Ant doping Code -2016 imposes "strict liability" on the athlete notwithstanding the athlete's intention or knowledge of administering prohibited substances in to one's body and requires the Disciplinary Panel to impose sanctions merely on the basis that the prohibited substance was found in her body.

And we severely warn her to avoid from taking all the vitamins and supplements which may have contained Prohibited Substances and before taking or injecting anything into her body to make sure whether it contains Prohibited Substances or not. As an athlete competing at the national and international levels, she owes a duty and responsibility in this

regard. She should improve her knowledge not only on the Prohibited Substances, but also on the Prohibited List published by WADA annually.

On this 27 Day of May 2019 at Colombo, Sri Lanka.
