TEAM**

## Research

A new research was designed under the title of “The effect of bacterial contamination on the result of urine sample testing for banned substances in sports”. Documentation was prepared and submitted to the Ethic Review committee in order to obtain Ethical approval for the conduction of this research. The research proposal was also submitted for the “Science research Grant - 2019” given by World Anti-Doping Agency in order to obtain funds required to conduct this research.

The Arishta research manuscript for publication was reformat with discussing Dangerous Drug control board. It was submitted to the Journal of sports and Health for the second time after changing its format.

## Information Technology

### Promotional Video on SLADA History

## Android Application for Annual Prohibited list published by World Anti-Doping Agency

### DR App (Drug Reference App)

This mobile application assists athletes to check the status of their medication, purchased in Sri Lanka, against the World Anti-Doping Agency (WADA) Prohibited List. WADA issues a Prohibited List, (a List of Prohibited Substances and Methods), that designates what is prohibited in- and out-of-competition.

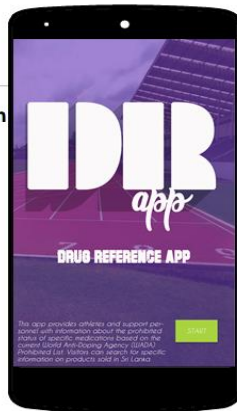

This application helps specially for Sri Lankan athletes and doctors to continuously monitor the doping status of the drugs.

App launched to Google Play Store on 28th February 2019 at the SLADA Headquarters ceremonial opening.

### Features of the app

#### DR App

Main Screen  
Press on "start" button

#### Login Screen For existing users

#### Signup Screen For new users
